Temporal Retrieval and Reasoning

Input

Result

step1 *Locate* target device and record
step2 *Select* metric on observations
step3 *Analyze* telemetry within the specified window

Contextual Retrieval and Reasoning

Input

Result

step1 *Retrieve* report and rule
step2 *Extract* context and parameters
step3 *Evaluate* rule against telemetry data

Comparative Retrieval and Reasoning

Input

Result

step1 *Locate* each target device
step2 *Identify* relevant metrics
step3 *Combine* results on a common comparison sacle
